

Rabbit restrainer (stainless - nilon)

Features

- Highly polished edges prevent chafing, especially at the neck.
- Non-slip surface provides better footing and helps to calm animal. This is much safer and easier on the animal's footpads.
- Clear acrylic aids in retaining body warmth. Hypothermia is eliminated.
- Unique curved back butt plate minimizes the risk of back injury. The plate is anatomically correct.
- Vertical head bars (adjustable) are easily removable if not needed.
- Rear access hole for pyrogen testing (N/A on 501-TC).
- Stainless steel pin offers several fine adjustment points for neck plate.
- Unit can be sanitized in a cage washer up to 180 degrees F or sterilized chemically.
- Non-slip base pads ensure unit stability.
