

Scilogex 300001 DILVAC Portable Dry-Ice Maker

Dilvac Portable Dry-Ice Maker

Dimensions of Dry-Ice Maker	Dimensions of block produced
8.9" Long x 6.3" Wide x 6.3" High	7.0" Long x 3.2" Wide x 4.3" High

The DILVAC Portable Dry-Ice Maker is the fastest way of providing a block of Dry-Ice for your needs. It is compact and lightweight, requires no electrical power and is safe and simple to use. Most importantly it is there to give you immediate access to Dry-Ice (-109.3°F) when you need it. The economy of having Dry-Ice 'on-tap' can provide considerable financial savings.

The DILVAC Portable Dry-Ice Maker produces a block (not slush!) of approximately 2.2Lbs (1KG) in weight in about 1 minute. Yield from a 75 lbs liquid cylinder - 5 to 6 blocks at room temperature. (Yield can appreciably increase at lower ambient temperatures, i.e. @ 41°F approximately 1/3 more blocks may be produced.)
