

## SAMSUNG SONOACE R7 ULTRASOUND SYSTEM

### SPECIFICATIONS

#### Ultra-Compact Unit with Advanced Performance

Get outstanding 2D color performance and a simple user interface with this system, ensuring an increase in patient output. It is ergonomic and offers sensitive waves and Color Doppler. The ergonomic and ultra-compact SonoAce R7 increases clinical efficiency through its combination of a simple user interface. It includes features such as second-stage filtering and spatial compounding to reduce extraneous noise and speckle while producing crystal-clear, high resolution results. By utilising outstanding Samsung 3D/4D color technology, images are easily viewed on a 19-inch LCD monitor. Clinical productivity is enhanced by customisable menus and a user-friendly design. A suite of extended tools ensures practitioners to have a wide range of resources to deliver timely, comprehensive and reliable diagnoses across multiple applications.
