

USG 2D DAWEI

SPECIFICATIONS

First-class digital imaging technology, more clearer image

1. Full-digital beam image formation technology
2. Double inserted probe identifies automatically
3. Generating clinical report automatically
4. The whole dynamic receiving focusing
5. High –precision digital scan conversion DSC
6. Back-lit photoelectricity track control
7. Intelligentized TGC gain control of the whole paragraph 8
8. Advanced technology to ensure that the SMT placement machine reliability

Standard configuration USG 2 dimensi Dawei 3101A:

1. 10 inch non-interlaced monitor
2. 3.5MHz Multi-freq Convex Probe(2.5MHz-5.0MHz)

Options:

1. 6.5MHz High frequency Trans-vaginal probe(5.5MHz-7.5MHz)
2. 7.5MHz High frequency linear probe(7.5MHz-8.5MHz)
3. 7.5 MHz Multi-freq rectal Linear Probe
4. Trolley
5. Color laser printer
6. 3D workstation software
